New York, New York,

## Summary

---

Software Engineer with years of experience at startups. Adept at both Frontend and backend development across a range of products.

## Experience

---

### Sevenrooms - Jan 2015 - Present

Senior Software Engineer - *Python, Node.js, React.js, Django, webapp2, App Engine, Google HRD*

- I Established the development workflow - practices such as code reviews, continuous integration and testing.
- Lead developer on tooling and build systems - allowing other developers to deploy code, run tests, etc.
- Lead developer on API architecture - authentication, security, middleware, etc.
- Lead developer on refactoring frontends into single page apps.
- Lead developer on several consumer facing products servicing the hospitality industry.

### Nomi - 2013 - 2015

Software Engineer - *Python, Tornado, MongoDB, knockout.js, Durandal.js*

- Founding member of the engineering team.
- Lead developer for marketing attribution products.
- Team Lead for front end development team, and front end application architecture.
- Responsible for server configuration and deployment management.
- Wrote several Apis for retail metrics for various products.

### Zignage - 2011 - 2012

Software Engineer - *Python, C, Django*

- Designed embedded system(Kiosk) for use in Universities.
- Lead developer on video capture system for university classrooms.
- Helped develop a Django app for university course management and video consumption.

### NYC DOE - 2010 - 2011

Coordinator

I was a coordinator for an NYC school initiative called Mouse Squad. It's purpose was to educate and expose children to technology in the classroom. I created a curriculum for students to learn html, basic javascript, and also taught the course. I also held workshops for teachers and parents about how to use technology at home and in the classroom.

### Research Foundation CUNY - 2008 - 2011

Research Assistant - *C, Java*

- Wrote several pieces of software to compute results for research purposes.
- Wrote software to visualize operations on binary tree pairs.
- Talked at conferences and co-authored publications - [Average reductions between random tree pairs](#)

## Education

---

**CUNY - City College of New York - 2005 - 2010**

- Computer Engineering, BE

**CUNY - HUNTER - 2015 - Present**

- Mathematics, MA
